

BABYLEAF CHARD

SIROCCO

SIROCCO is a hybrid green chard with a bright red stem best suited to cool season baby leaf production. **SIROCCO** shows excellent vigour and uniformity and is a significant improvement in quality and reliability of chard production.

Although **SIROCCO** can be grown year round it has its biggest advantage in the cool and cold of Winter/Spring where the hybrid vigour reduces time to harvest. The red stems of **SIROCCO** are a 'low-bleed' risk - a problem often associated with beets when grown for baby leaf.

The information provided here is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions, including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds (NZ) Ltd cannot accept liability as to accuracy of this information.

VARIETY FEATURES

- Mid-green leaf colour
- Red stem colour
- Oval leaf shape
- Smooth leaf shape
- Erect growth habit

AGRONOMIC CONSIDERATIONS

- Best results obtained when grown in the colder months
- Good field tolerance to bacterial spot

PACK SIZES

100m, 500m, 1mm
