

ROCKMELON INFINITE GOLD

INFINITE GOLD is a Harper type rockmelon and has been bred for flavour, fruit quality and long shelf life (LSL) with a strong disease package of powdery mildew (Px) and fusarium (Fom). **INFINITE GOLD** is a highly adaptable variety and has shown very good tolerance to ground cracking. The non-sutured fruit have a full net and are produced on a vigorous vine, setting mostly on the crown.

Highly uniform fruit size and shape in addition to high yield potential are key features of **INFINITE GOLD**. The fruit are large in size and can reach 12-14 Brix at correct maturity under favourable conditions. The flesh is firm with a dark orange colour and a small seed cavity.

The information provided here is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions, including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds (NZ) Ltd cannot accept liability as to accuracy of this information.

VARIETY FEATURES

- Non-sutured fruit
- Round-oval fruit shape
- Fruit weight about 1.6kg

AGRONOMIC CONSIDERATIONS

- A hybrid variety
- Optimal flavour is obtained when the fruit are harvested at a Brix of 13-14

PACK SIZES

1M, 10M, 50M

DISEASE RESISTANCES

High Resistance: Fom:0-2, Px:1,2
