

# BUTTERNUT PUMPKIN LINUS

A hybrid Waltham type but with a much thicker neck, **LINUS** provides growers with a much higher yield and an improved pack out due to the greater uniformity in fruit size and shape. With an average fruit weight of approximately 1.7kg, **LINUS** has the ability to be sold by piece or as a cut product.

Excellent flesh quality is a key feature of **LINUS** with a deep orange colour and firm texture. A small seed cavity gives a more desirable flesh to weight ratio and improves recoveries for processing. Highly adaptable, **LINUS** can be grown in a range of growing situations.

 HARVEST PERIOD

The information provided here is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions, including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds (NZ) Ltd cannot accept liability as to accuracy of this information.

## VARIETY FEATURES

- High yielding
- Pear fruit shape
- Moderate storage ability

## AGRONOMIC CONSIDERATIONS

- The plant should be grown well to establish plant size prior to fruit set. Planting too late in the season may result in small fruit and inadequate maturation time.

## PACK SIZES

1M, 5M, 25M
