

# LETTUCE MULTILEAF WILDLING

**WILDLING** is a mid-green multileaf lettuce that shows great adaptability for year round production in a range of growing conditions. **WILDLING** is vigorous but produces an even head with uniform leaves distributed throughout resulting in less wastage of large, outer leaves. **WILDLING** has a very high leaf count that creates bulk and good recovery of processed leaves. Due to its versatility, **WILDLING** can be utilised for both whole head production (sleeving) and for cut leaf to include in salad mixes. **WILDLING** has shown good field tolerance to both anthracnose and sclerotinia. In warm conditions **WILDLING** produces highly uniform heads ensuing high crop recoveries at harvest and is slow to bolt during the heat.

## VARIETY FEATURES

- Mid-green colour
- Large head size
- High vigour

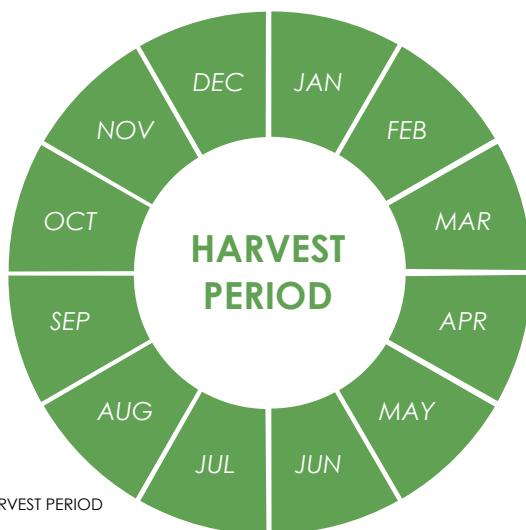

## AGRONOMIC CONSIDERATIONS

- Suitable for field production and hydroponic systems
- Strong tolerance to tipburn
- Strong tolerance to bolting

## PACK SIZES

1M, 5M, 25M

## DISEASE RESISTANCES

High Resistance: Bl:1-35
