

LETTUCE MULTILEAF ROZEE

ROZEE is a red multileaf lettuce that produces high leaf numbers resulting in a bulky head great for sleeving and excellent yields of cut leaf for inclusion in salad mixes. Suitable for year round production under some growing environments, **ROZEE** produces leaves with a red leaf margin and a light green inner leaf that provides an attractive contrast. The leaves of **ROZEE** remain highly uniform thereby ensuring few leaves are discarded due to being out of spec, minimising waste and improving processed recoveries. The stem attachment of the **ROZEE** leaves is narrow and the leaves have a good thickness to them as well as a three dimensional leaf structure which seems to handle processing better and fills out salad bags. **ROZEE** has shown excellent field tolerance under high anthracnose pressure.

The information provided here is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions, including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds (NZ) Ltd cannot accept liability as to accuracy of this information.

VARIETY FEATURES

- Double red colour
- Large sized heads
- High vigour

AGRONOMIC CONSIDERATIONS

- Suitable for field production and hydroponic systems
- Strong tolerance to tipburn
- Strong tolerance to bolting

PACK SIZES

1M, 5M, 25M

DISEASE RESISTANCES

High Resistance: Bl:1-29, 31-35
