

BABYLEAF BEET AMARENA

AMARENA is a dark red beet leaf suitable for year round salad production. **AMARENA** has even colour throughout the leaf (and on both sides of the leaf) and will not bleed post-harvest as many beets do. It maintains an upright growth habit allowing for ease of harvest. **AMARENA** is an alternative to Blush having an advantage in that it has a higher tolerance to Pseudomonas (bacterial spotting) during Autumn when this is often a problem in both beets and chards. Like Blush, **AMARENA** maintains a dark red leaf colour in hot conditions, unlike most older Bull's Blood types which get a blotchy pattern on the leaf.

VARIETY FEATURES

- Dark red/purple colour (stem and leaf)
- Oval leaf shape with slightly wavy margins
- Upright growth habit

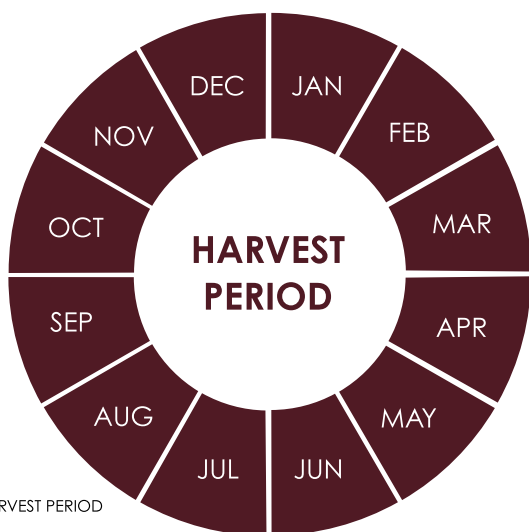

AGRONOMIC CONSIDERATIONS

- Suitable for both warm and cool conditions
- Strong tolerance to bleeding post-harvest
- Strong tolerance to Pseudomonas

PACK SIZES

1kg, 5kg, 10kg
