

CUCUMBER CONTINENTAL ZEPLIN

ZEPLIN is a Continental cucumber for heated glasshouse production. A consistent performer, **ZEPLIN** maintains a high level of production across a wide harvest window with a combination of strong resistance against virus and powdery mildew. Because of its open plant architecture, **ZEPLIN** is a generative, labour friendly variety. Fruits of **ZEPLIN** maintain high quality across the growing cycle of the crop. Cucumbers are smooth with a slight rib and nice dark green colour.

VARIETY FEATURES

- 32 – 34 cm fruit length
- Single fruiting
- Harvest period Spring, Summer and Autumn

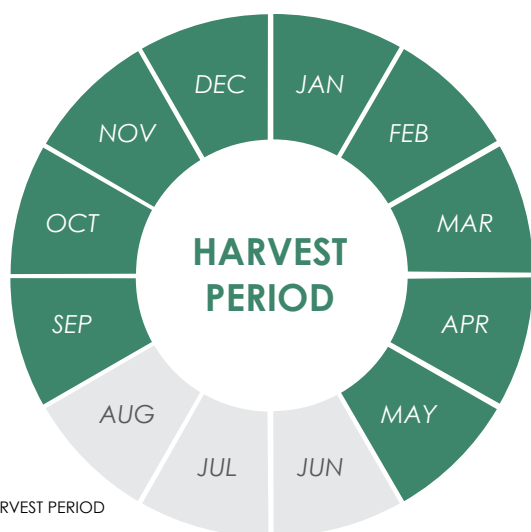

AGRONOMIC CONSIDERATIONS

- Suitable for heated growing environments
- Early maturity
- Open plant habit

PACK SIZES

1C, 1M

HARVEST PERIOD

The information provided here is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions, including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds (NZ) Ltd cannot accept liability as to accuracy of this information.

DISEASE RESISTANCES

High Resistance: Ccu, CMV, CVYV, Px, CGMMV
