

# LETTUCE COS MINI CARINA

**CARINA** is a mini cos suited to warm and cool season (shoulder) harvest and, as such, has a very wide harvest window. In more mild areas **CARINA** will be able to be harvested right through Summer. **CARINA** has thick, lightly blistered leaves and a yellow internal. **CARINA** is more vigorous than sister-line Chico and makes a nice alternative variety to run alongside – although **CARINA** will be able to be harvested later into the cold. **CARINA** has a wider butt than Chico giving a better bag fill when used in twin cos packs.

## VARIETY FEATURES

- Mid-green colour
- Larger sized little gem
- Medium vigour

## AGRONOMIC CONSIDERATIONS

- Suitable for field production and hydroponic systems
- Strong tolerance to tipburn
- Strong tolerance to bolting

## PACK SIZES

1M, 5M, 25M, 100M

The information provided here is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions, including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds (NZ) Ltd cannot accept liability as to accuracy of this information.

## DISEASE RESISTANCES

High Resistance: Bl:1-26,28,32
