

HERB ROCKET WINDSOR

WINDSOR is a wild rocket that provides a more vigorous alternative to Rocky and Gemini for growers wanting a faster growing wild rocket. A Diplotaxis type (true wild rocket), **WINDSOR** is fast to establish making it ideally suited to cooler situations. It is dark green in colour and develops a very thick leaf ensuring an extended shelf life. **WINDSOR** has a deeply serrated leaf, and has a sharp, peppery, wild rocket taste. **WINDSOR** shows medium to strong tolerance to bolting in the heat of Summer so can be used right through the growing season. **WINDSOR** can be harvested year round in hydroponic systems.

VARIETY FEATURES

- Dark green leaf colour
- Serrated leaf margins
- Erect growth habit

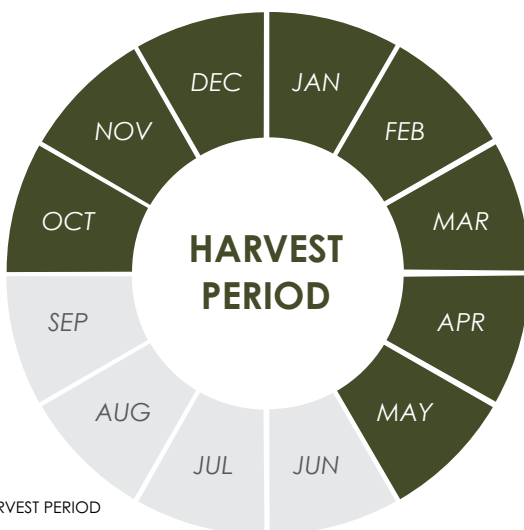

AGRONOMIC CONSIDERATIONS

- Moderate bolting tolerance
- Best results obtained from high population sowings for machine harvesting

PACK SIZES

100G, 1KG, 5KG, 10KG
