

# HERB CHERVIL

## KERBEL

Very quick growing, **KERBEL** will need to be sown every two to three weeks in order to have continuous supply to meet market demands. **KERBEL** is a high yielding type with attractive, smooth leaves of good colour.

A compact plant, so suitable for pot cultivation as well as fresh cut. Chervil loses its aroma when dried, so is mostly frozen for processed use. Used fresh **KERBEL** is popular for flavouring soups, salads, yoghurt and egg dishes.

### VARIETY FEATURES

- Dark green leaf colour
- Finely feathered leaf
- Vigorous and erect plant habit

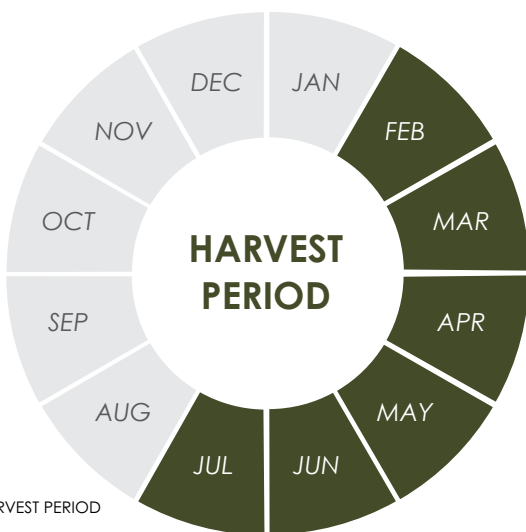

### AGRONOMIC CONSIDERATIONS

- Suitable for open field or hydroponic production systems
- Will flower quickly from Spring sowings therefore sowing at the end of Spring is better in order to reduce the risk of flowering and to enable the possibility of a second cut

### PACK SIZES

100G, 1KG, 5KG
