

SPINACH RAVEN

RAVEN is a very dark green spinach suitable for babyleaf production under warm conditions. **RAVEN** produces very thick leaves with an upright growth habit making it easy for mechanical harvesting of the crop.

RAVEN is an extremely versatile variety with a wide harvest window and its adaptability to variable conditions makes it a reliable variety, particularly during the Autumn when heavy rains can cause disease problems and crop yellowing. **RAVEN** produces highly uniform leaves with regards to size, shape and maturity across the crop making it an ideal variety for Summer where consistency is key.

The information provided here is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions, including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds (NZ) Ltd cannot accept liability as to accuracy of this information.

VARIETY FEATURES

- Very dark green leaf colour
- Oval leaf shape
- Slight savoy leaf texture

AGRONOMIC CONSIDERATIONS

- Strong tolerance to bolting
- Strong tolerance to Stemphylium

PACK SIZES

100M, 500M, 1000M

DISEASE RESISTANCES

High Resistance: Pfs:1-11,15-16
Intermediate Resistance: Pfs:12,14
