

BABYLEAF MUSTARD

PERI

PERI is a bright lime green mustard with heavily serrated, antler-like leaves, for year-round baby leaf production. **PERI** is high yielding and has proven to have good shelf life. The leaf gives good volume to fill salad bags and offers an interesting point of difference in the mix with its colour and unique shape. **PERI** is a nice complement to the red elk Inca. For growers looking for a uniquely shaped, green-coloured leaf that gives contrast to the usual oval and elongated leaf shaped of mibuna and pak choi's, **PERI** is an ideal choice.

VARIETY FEATURES

- Mid green leaf
- Mid green stem
- Serrated leaf shape
- Erect growth habit

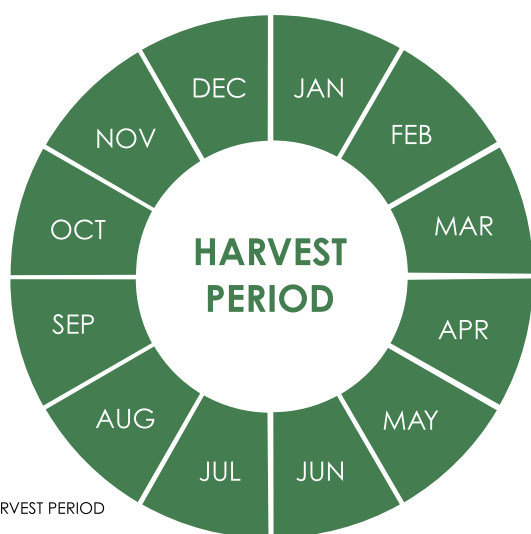

AGRONOMIC CONSIDERATIONS

- Best results obtained from high population sowings particularly for machine harvested crops
- Best results obtained when grown in warmer conditions
- Strong tolerance to bolting

PACK SIZES

1kg, 5kg, 10kg
