

# LETTUCE CRUNCHY COS MIDI SANTIAGO

**SANTIAGO** is an extremely versatile, larger midi-cos sized, crunchy cos which is suitable for year round production but best suited to cooler conditions when used for process leaf production due to its larger size. That said, **SANTIAGO** is slow to bolt so may be used through the warmer months when bolting is an issue in more traditional, whole head production.

**SANTIAGO** has a narrower leaf than the likes of Cristobal. **SANTIAGO** has a very sweet taste which it maintains in slower growing periods of cold.

## VARIETY FEATURES

- Dark green colour
- Midi-cos size
- Medium vigour

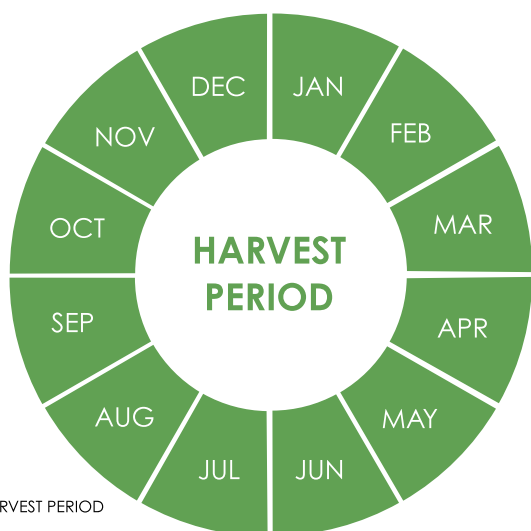

## AGRONOMIC CONSIDERATIONS

- Suitable for field production
- Strong tolerance to tipburn
- Strong tolerance to bolting

## PACK SIZES

1M, 5M, 25M, 100M
