

PARNSIP SABRE

SABRE is a new hybrid parsnip which has a white smooth-skin finish which is noticeably slower to colour than other varieties on the market.

The smooth-skinned roots of **SABRE** have a great flavour and strong tolerance to root canker. The roots have a shallow crown and better weight distribution than other varieties.

SABRE'S consistent shape means the roots fit well into pre-packs and bruise less during the packing process.

VARIETY FEATURES

- White smooth finish which is slower to colour
- Better weight distribution than other varieties down the root
- Consistent root shape suits pre-packs
