

LETTUCE LOLLO ROSSA ROSELLA

ROSELLA is a very dark red lollo rossa suitable for production in both hydroponic and field production. **ROSELLA** has a medium vigour, a very tight leaf curl and produces uniform heads throughout the crop.

It is a versatile variety that allows for year round production in most situations and significantly, for a red lollo, retains exceptional colour through the range of seasons. For a red, **ROSELLA** produces excellent leaf numbers to give bulk to sleeved head presentation and yield in situations where it is processed for leaf use. **ROSELLA** is strong against tipburn and bolting in the heat.

The information provided here is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions, including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds (NZ) Ltd cannot accept liability as to accuracy of this information.

VARIETY FEATURES

- Dark red colour
- Medium head size
- Medium vigour

AGRONOMIC CONSIDERATIONS

- Suitable for hydroponic production but can also be grown in the open field
- Strong tolerance to tipburn
- Medium vigour

PACK SIZES

1M, 5M, 25M, 100M

DISEASE RESISTANCES

High Resistance: Bl:16-23, 25-28, 30-33
