

RED RADISH HADLEE

HADLEE is a red radish for warm season harvest.

HADLEE produces round, dark red roots with a high yield potential because of its hybrid uniformity.

HADLEE has strong tops which are suitable for bunching presentation of the roots or can be easily removed for packing into punnets.

VARIETY FEATURES

- Dark red root colour
- Round root shape
- Strong tops

AGRONOMIC CONSIDERATIONS

- A hybrid variety

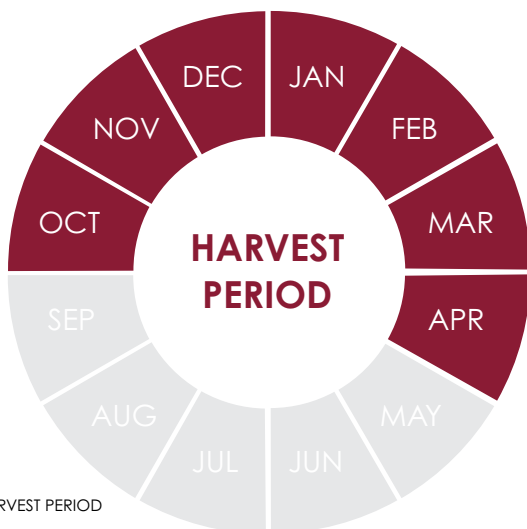

PACK SIZES

10M, 50M, 100M

Untreated seed

The information provided here is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions, including cultural/management practices, climate, soil type and geographic location.
