

CELERIAC RANGER

RANGER is a highly uniform, hybrid celeriac for Autumn and Winter production.

RANGER produces smooth, round bulbs with an attractive white internal. Strong, upright, dark green foliage paired with a low root attachment makes **RANGER** easy to harvest and clean.

Firm flesh and good internal colour allow this variety to be used in both the fresh and process market.

Final size of this variety can be easily manipulated by increasing or decreasing planting density.

VARIETY FEATURES

- Medium bulb size
- Strong vigour
- Early and main season.

HYBRID VARIETY

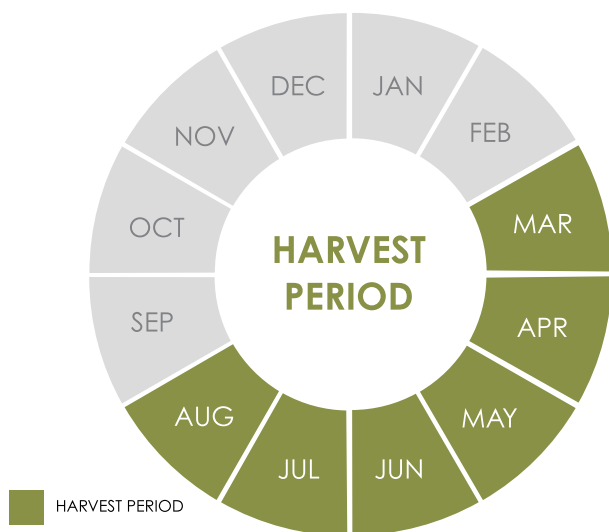

PACK SIZES

5M, 10M, 20M

Primed Pill

Available only as primed seed.
