

LETTUCE BUTTERHEAD KEPLER

KEPLER is a mid-green coloured, traditional butterhead suited to year round production in hydroponics.

KEPLER has a shiny green leaf making for an attractive presentation when sleeved.

KEPLER has strong cold tolerance, so is a good choice for winter and spring, while showing strong bolting tolerance when transitioning in to the warm.

KEPLER has a flat base with a small cut area so browning is kept to a minimum.

KEPLER has a strong mildew package.

VARIETY FEATURES

- Mid-green colour
- Medium head size
- Medium vigour.

AGRONOMIC CONSIDERATIONS

- Suitable for hydroponic production systems
- Strong tolerance to tipburn
- Strong tolerance to bolting.

PACK SIZES

1M, 5M, 25M, 100M

Untreated seed

The information provided here is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions, including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds (NZ) Ltd cannot accept liability as to accuracy of this information.

DISEASE RESISTANCES

High Resistance: Bl.1-32, LMV:1, Nr:0
Intermediate Resistance: Fol.(1)
