

LETTUCE ICEBERG GUSTO

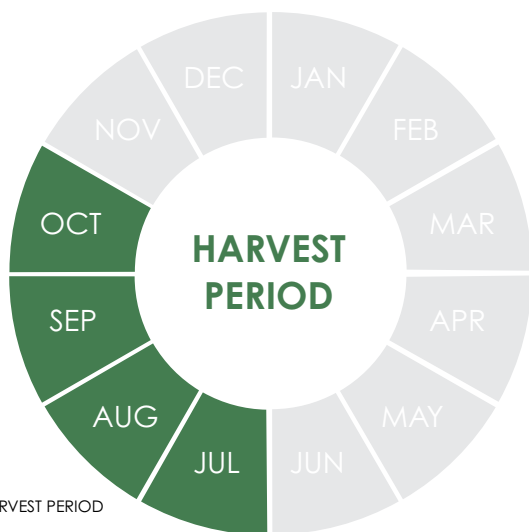

A sisterline to Bandito, **GUSTO** is a true winter-harvest iceberg suited to areas and situations that require extremely high vigour.

Suitable for harvest from early winter right through until early/ mid spring **GUSTO** produces consistently large heads which are protected by a large, leafy frame. Due to the high leaf count in the frame, **GUSTO** sits very high off of the ground, assisting in ease of harvest.

GUSTO will grow on through heavy frosts and result in high cut-out rates.

GUSTO has shown consistently high tolerance to anthracnose pressure and has an excellent mildew resistance package.

The information provided here is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions, including cultural/ management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds (NZ) Ltd cannot accept liability as to accuracy of this information.

VARIETY FEATURES

- Dark green head colour
- Large head size
- Strong vigour and large frame.

AGRONOMIC CONSIDERATIONS

- Strong tolerance to anthracnose
- Medium tolerance to bolting.

PACK SIZES

10M, 25M, 100M

DISEASE RESISTANCES

High Resistance: Bl.1-37

UNTREATED SEED

Available as untreated seed.
