

LETTUCE ICEBERG MATADOR

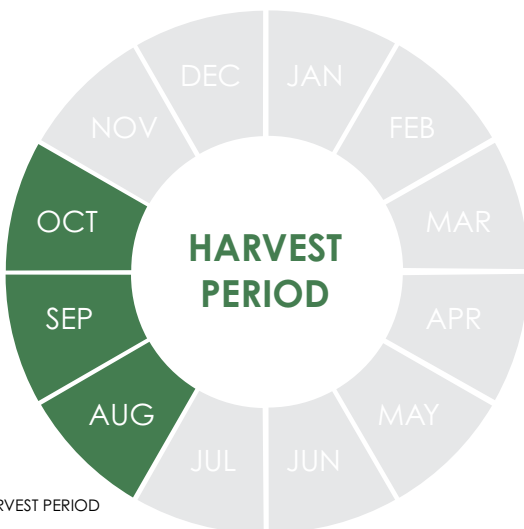

MATADOR is an extremely vigorous cool/cold season variety suited to late winter and spring harvest.

MATADOR is a 'Vanguard' type with a heavily blistered leaf and is able to withstand frosts due to its large frame.

MATADOR is a sure-heading variety which provides for a uniform harvest and a high cut-out of consistently large, round heads.

Given it is a sure-heading type, **MATADOR** will reliably produce heads during periods of more mild weather during late spring – a regular issue with older varieties.

MATADOR forms round heads that sit up off of the ground allowing for ease of harvest. **MATADOR** has shown excellent tolerance to mildew and anthracnose.

The information provided here is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions, including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds (NZ) Ltd cannot accept liability as to accuracy of this information.

VARIETY FEATURES

- Large head size
- Large frame size
- Late winter and early spring harvest.

AGRONOMIC CONSIDERATIONS

- Strong tolerance to tip burn
- Medium tolerance to bolting
- Avoid warm autumn conditions.

PACK SIZES

10M, 25M, 100M

DISEASE RESISTANCES

High Resistance: Bl.1-27, 29, 30, 32

UNTREATED SEED

Available as untreated seed.
