

LETTUCE ICEBERG

SAHARA Nr

SAHARA is a larger framed iceberg which produces medium sized heads through the warmer months.

It will suit central areas (Horowhenua/Nelson) as a late spring/early summer harvest variety and more northern areas from late spring/summer through the heat of summer and on until autumn.

SAHARA shows strong tolerance to bolting and the larger frame gives it plenty of vigour in the transition from spring into true summer. In the warmer months it can produce a larger frame and be a little later to head but it will produce a very high cut out.

Due to its versatility many growers will find a wide, warm-season window for **SAHARA**.

The information provided here is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions, including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds (NZ) Ltd cannot accept liability as to accuracy of this information.

VARIETY FEATURES

- Mid-green head colour
- Medium head size
- Strong vigour and medium-large frame.

AGRONOMIC CONSIDERATIONS

- Fusarium resistance Fol.(1)
- Strong tolerance to tip burn
- Strong tolerance to bolting.

PACK SIZES

10M, 25M, 100M

DISEASE RESISTANCES

High Resistance: Bl.1-40 Nr:0

FUSARIUM RESISTANCE

UNTREATED SEED

Available as untreated seed.
