

# LETTUCE ICEBERG TITUS

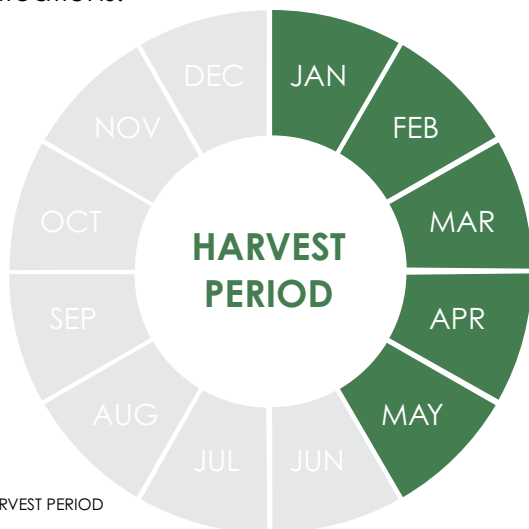

**TITUS** is an extremely versatile, warm season variety which gives growers unrivaled flexibility.

In northern areas, growers may be able to harvest this variety from late spring on through the heat of late summer and well into late autumn.

In more extreme locations, it is likely **TITUS** will still find a slot where its uniformity and versatility can allow for harvesting in transition periods of both warm and cool, without a compromise on uniformity and quality.

**TITUS** has a sizable frame which allows for both protection of the head from soil disease in humidity and extra vigour when required late in autumn.

**TITUS** consistently produces medium sized heads under a range of situations.

The information provided here is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions, including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds (NZ) Ltd cannot accept liability as to accuracy of this information.

## VARIETY FEATURES

- Mid-green head colour
- Glossy leaf
- Vigorous, uniform growth.

## AGRONOMIC CONSIDERATIONS

- Suitable for field production
- High tolerance to tip burn
- Medium bolting tolerance.

## PACK SIZES

10M, 25M, 100M

## DISEASE RESISTANCES

High Resistance: Bl.1-23, 25, 28

## UNTREATED SEED

Available as untreated seed.
