

LETTUCE ICEBERG ICEQUEEN

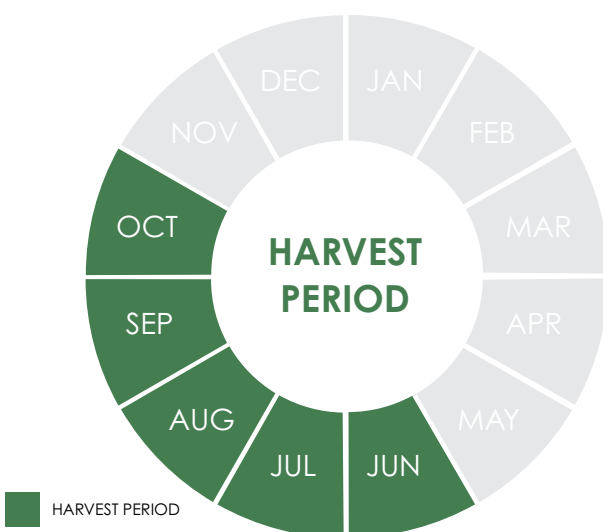

A sisterline to Bandito and Gusto, **ICEQUEEN** is a cool and cold season harvest iceberg suited to areas and situations that require extremely high vigour.

ICEQUEEN potentially has a very wide window and is suitable for harvest from early winter right through until mid-spring.

ICEQUEEN produces consistently large, uniform heads that are slightly flattened, making for easy packing.

ICEQUEEN has shown a good level of tolerance to anthracnose pressure and the large frame assists in frost protection.

The information provided here is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions, including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds (NZ) Ltd cannot accept liability as to accuracy of this information.

VARIETY FEATURES

- Dark-green head colour
- Large head size
- Strong vigour and large frame.

AGRONOMIC CONSIDERATIONS

- Strong tolerance to anthracnose
- Medium tolerance to bolting.

PACK SIZES

10M, 25M, 100M

DISEASE RESISTANCES

Intermediate Resistance: Bl.1-36

UNTREATED SEED

Available as untreated seed.
