

# LETTUCE COS MINI LIEUTENANT Nr

**LIEUTENANT** is a mid-green, little gem cos suited to year-round hydroponic production for both baby cos heads and for leaf production.

**LIEUTENANT** has thick, lightly-blistered leaves and a yellow internal. **LIEUTENANT** is upright in habit and has a U-shaped base making it an ideal option for twin packs. When grown in hot conditions, **LIEUTENANT** shows good tolerance to both internal tipburn and bolting.

In the shoulder season when pythium is an issue in hydroponic systems, **LIEUTENANT** shows excellent tolerance. With a strong mildew package (Bl. 1-35, 37) and Nasonovia resistance, **LIEUTENANT** provides growers with good disease protection.

The information provided here is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions, including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds (NZ) Ltd cannot accept liability as to accuracy of this information.

## VARIETY FEATURES

- Mid-green colour
- Medium sized, little gem mini cos
- Medium vigour.

## AGRONOMIC CONSIDERATIONS

- Suitable for hydroponic systems
- Strong tolerance to tipburn
- Strong tolerance to bolting.

## PACK SIZES

1M, 5M, 25M, 100M

## DISEASE RESISTANCES

High Resistance: Bl:1-35,37, Nr:0
